SKILLS

Technologies	Golang, Java, Python, SQL, Git, Envoy, MongoDB, Kafka, Elastic, OpenTelemetry, Prometheus, Grafana
Infrastructure	Docker, Kubernetes, Terraform, AWS, GCP, Puppet
AI Skills	Claude Code, Copilot, Whisper, basic LLM knowlage
Concepts	Service Mesh, distributed computing, microservices, performance tuning
Soft Skills	Precise communication, leadership, proactivity, team building

EXPERIENCE

Senior Software Engineer - Kuma Service Mesh Kong Inc.	Sep 2022 - Now <i>Cracow, Poland</i>
--	---

- Core contributor to CNCF Kuma (open source) and Kong Mesh (enterprise). Building SaaS Service Mesh platform from ground up.
- Driving Mesh Perf initiative - continuous performance testing infrastructure, benchmarking, regression detection of Mesh.
- Led MeshMetric policy development - unified metrics collection with OpenTelemetry, application metrics scraping, dynamic configuration without proxy restarts.
- Owner of Kuma documentation - strategy, information architecture, quality standards.
- Driving community growth and product marketing - KubeCon speaker, Kuma community calls host, CNCF Slack maintainer.

Team Leader - Service Mesh Allegro Sp. z o.o.	May 2021 - Sep 2022 <i>Cracow, Poland</i>
---	--

- Rebuild one of the most important teams in Allegro from scratch. Leading team of 5 people responsible for service-to-service communication (>1500 services and ~2 million RPS), microservice SDK (>1000 usages, Java + Spring) and developers efficiency.
- Being on call for mission critical services and coordinating company-wide incidents.
- Created several for developers like services connections map and httpie plugin that uses Consul for service discovery.
- Worked on redesigning and simplifying deployment process in Allegro, and prepared guide for migrations at scale.

Software Engineer - Notifications Allegro Sp. z o.o.	Dec 2018 - May 2021 <i>Cracow, Poland</i>
--	--

- Improved performance of our batch notification sending mechanism. Increasing throughput by 800% (from 500 RPS to 4000 RPS).
- Improved stability and performance of our main notification service by rewriting main service logic to a highly concurrent approach. Migrated queue from MongoDB to Kafka with delay topics. This reduced response times from our service by 30% and reduced the number of incidents to almost zero.

Software Engineer - User profiles Sabre Poland	Jul 2015 - Dec 2018 <i>Cracow, Poland</i>
--	--

- Worked on one of the Sabre core services that manage more than 200 million airline user's profiles.

PROJECTS

Whisper Hotkey macOS voice-to-text app using local Whisper models - Rust, whisper.cpp, global hotkey triggers with 100% offline transcription [Github repo](#)

EXTRA-CURRICULAR ACTIVITIES

- Founder member of AI enablement Guild in Kong
- Speaker at KubeCon, 4Developers, and Allegro Tech Meeting. Led conference track as a showrunner
- Proactively looking for performance improvements of Allegro technical platform, by creating and analysing global dashboards and looking for outliers. Thanks to this, Found and tuned a couple of services. Working on performance of our microservice SDK.
- A member of Allegro hiring squad. I have conducted more than 100 systems design and technical interviews. Redesigning systems design interview for frontend developers and of systemic tool for recruiters calibration. Conducting behavioural interviews.
- Prepared and conducted highly acclaimed Systems Design workshops, during which we were designing URL shortener service. [Link to meetup](#)

EDUCATION

Bachelor and Master of Computer Science , AGH University of Science and Technology in Cracow Bachelor thesis: "Predicting song popularity score using LSTM networks"	2013-2018
--	-----------
